Dear Colleague,

The **International Conference on Environmental Pollution and Clean Bio/PhytoRemediation (EPCR 2010)** will take place next **16-19 June 2010** in Pisa, Italy. The [preliminary programme](#) is available at the meeting's [website](#).

The main objective of this Conference is to showcase the most recent advances in Bio/Phytoremediation and to discuss, in an interdisciplinary contest, the potential of phytoremediation to clean up contaminated soils, sediments, brownfields and wastewater.

The Conference has been organised to bring together young researchers and established scientists from different countries of the world. Set within the beautiful region of Tuscany, Pisa – with its UNESCO World Heritage Site – offers a unique location for fruitful and exciting scientific discussions.

We are certain that the excellent content of the proposed topics will encourage you to attend this Conference. Registrations will open **21 December 2009**.

We look forward to welcoming you in Pisa next June.

On behalf of the Organising Committee,

Azuleon Meetings

International Organising Committee

Danuta Maria Antosiewicz (Poland)
Alan Baker (Australia)
Laszlo Erdei (Hungary)
Stanislaw Gawronski (Poland)
Avi Golan (Israel)
